

HUMIDITY INDICATOR CARDS (HICS)

Moisture indicator cards in paper form with chemically impregnated fields that change colour depending on the relative humidity of the ambient air.

DESICCANT

The desiccant absorbs the humidity inside the moisture barrier bag.

We offer clay desiccant, silica gel and molecular sieve.

Tape & Reel

BAGS DRY PACK

BAGS

Our bags protect your components from moisture, static discharge and dirt.

MOISTURE BARRIER BAGS (MBB)

Our aluminum composite bags protect your sensitive components or assemblies from moisture and corrosion and are electrostatically shielding.

For optimum protection of the components the appropriate desiccant and a humidity indicator card should be placed into the bag before vacuuming.

SHIELDING BAGS

Metallised transparent shielding bags for the shipment and protection of electrostatic sensitive components, semiconductors and assemblies.

- + weldable
- + with and without ZIP
- + various material thicknesses and sizes
- + with ESD standard print and customer print

ANTISTATIC BAGS (PINK POLY)

Our Pink Poly bags are available in different designs (bags, bubble bags, tubes), sizes and material thicknesses.

- + weldable
- + with and without ZIP
- + material thicknesses 50 μ , 90 μ
- + with ESD standard print and customer print
